

Kaunas Panemune Primary School provides primary level education for children from 7 to 11 years old.

The picturesque landscape in which the school is situated gives extraordinary possibilities to teach and to learn in a non-traditional way. We offer learning spaces for the arts, - dance, music, theatre, ceramics and painting.

Part of the education takes place not in classrooms but by using our extensive outdoor environment, including dedicated sports areas, a greenhouse and a kitchen garden.

Pupils stay at school after the lessons for extra curricula activities. Extra care is provided for those who stay at school till the end of their parents' working day.

Parents and carers play an active role in the school life. They are involved in school strategy and curriculum development processes, and their role in the school culture is also significant.

We are experienced in participating in small and large scale, short and long-term Erasmus, Comenius and NordPlus projects. Working in collaboration with other schools and colleagues is therefore, a usual activity for us.
